\$890* for six months of unlimited cutting

*UNLIMITED CUTTING PLANS ARE NEGOTIABLE, WHILE BETA TESTING IS GOING – next slide!

You still have an option to use pay by square meters system!

What does BETA means

IMPORTANT our **SOFTWARE** is a **BETA version** – when you first start software:

- 1) Connect your plotter by **USB** (our software works only throw USB for right now)
- 2) Then make some test cuts in a **TEST THREAD**, they are free for cutting
- 3) You will have **10\$ BONUS** dollars on your account to cut and test our patterns on a real vehicle you have at work (this amount of money is enough to cut half of the interior or few parts of the exterior)

ALSO! BETA version - mean that some functions are still unviabile but we are working on it:

1. No **AUTONESTING system** you will need to set up patterns by yourself or use **our unique pre-made patterns layouts**.
2. No option to **CHANGE/EDIT** patterns inside our software, but we are working on it. For now only inner elements of the patterns is available for remove! Also you can mirror and clone parts if you need so!
